UAP Goods and Services Tender 3- Charge Carts

1 INVITATION FOR TENDER

1.1 Introduction

- 1.1.1 Vanuatu has liberalised its telecommunications market in 2008 and has undergone a significant transformation in accordance with the Government policy to stimulate the national economy. One of the policies of the Government is the Universal Access Policy (UAP). This policy aims to provide telecommunications internet services into rural and unserved areas that are not commercially viable for operators to provide telecommunications services.
- 1.1.2 As a means of expanding demand, maximising impact and learning important lessons in how best to harness the use of information and communications technologies for the furtherance of Vanuatu's development goals, TRR is embarked on three pilot programs. One of them, Tablets for Students (TFS), will make 7 inch Android tablets available to students in 7 schools located throughout Vanuatu.
- 1.1.3 These tablets require secure, easily organised and safe charging facilities suitable for use in rural and remote areas. These facilities will be provided by 'charge carts', as they are commonly known. These are portable enclosures, typically of steel construction, with space to store and charge a minimum quantity of 48 seven-inch tablets. Each charge cart must supply a minimum of 1.5Amps of 12Volt power to each of the 48 tablets simultaneously.
- 1.1.4 TRR is responsible for carrying out this Tender.
- 1.1.5 Tendering will be conducted through the Open and Competitive Tendering procedures in accordance with TRR's Tendering Guidelines and Procedures (as amended) as approved by the Tenders Board pursuant to the requirement of the Telecommunications and Radiocommunications Regulation Act 2009.
- 1.1.6 Tenders will be evaluated and Contracts will be awarded to the Bidder that, having met or surpassed the established technical criteria, provides best value.
