1 INVITATION FOR TENDER

1.1 Introduction

1.1.1 Vanuatu has liberalised its telecommunications market in 2008 and has undergone a significant transformation in accordance with the Government policy to stimulate the national economy. One of the policies of the Government is the Universal Access Policy (UAP). This policy aims to provide telecommunications internet services into rural and unserved areas that are not commercially viable for operators to provide telecommunications services.

1.1.2 As a means of expanding demand, maximising impact and learning important lessons in how best to harness the use of information and communications technologies for the furtherance of Vanuatu’s development goals, TRR has embarked on three pilot projects. One of these is the Computer Lab and Internet Community Centre programme, which will install computer labs in 15 schools.

1.1.3 Five (5) of these schools require power generation, storage and transmission systems sufficient to operate 10 ‘thin client’ computing terminals, attached to 2 desktop computers, and supporting a local WiFi hotspot as well as a low-power internet gateway and local content server, the latter two of which would be in constant operation.

1.1.4 TRR is responsible for carrying out the Tender.

1.1.5 Tendering will be conducted through the Open and Competitive Tendering procedures in accordance with TRR’s Tendering Guidelines and Procedures as approved by the Tenders Board pursuant to the requirement of the Telecommunications and Radiocommunications Regulation Act 2009.

1.1.6 Tenders will be evaluated and Contracts will be awarded to the Bidder that, having met or surpassed the established technical criteria, provides best value.
